

mobile phone chain

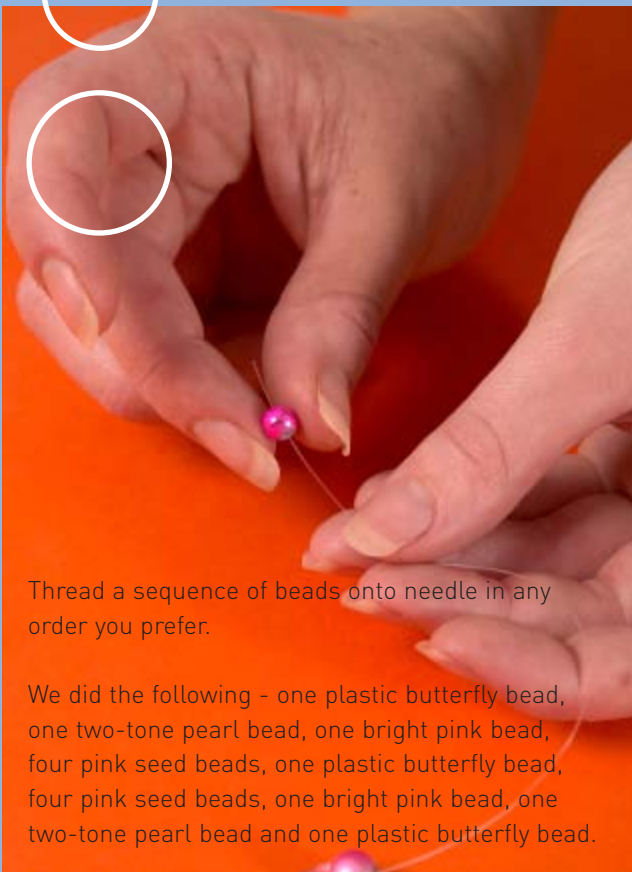

materials

- beading thread
- assorted beads
- jump ring

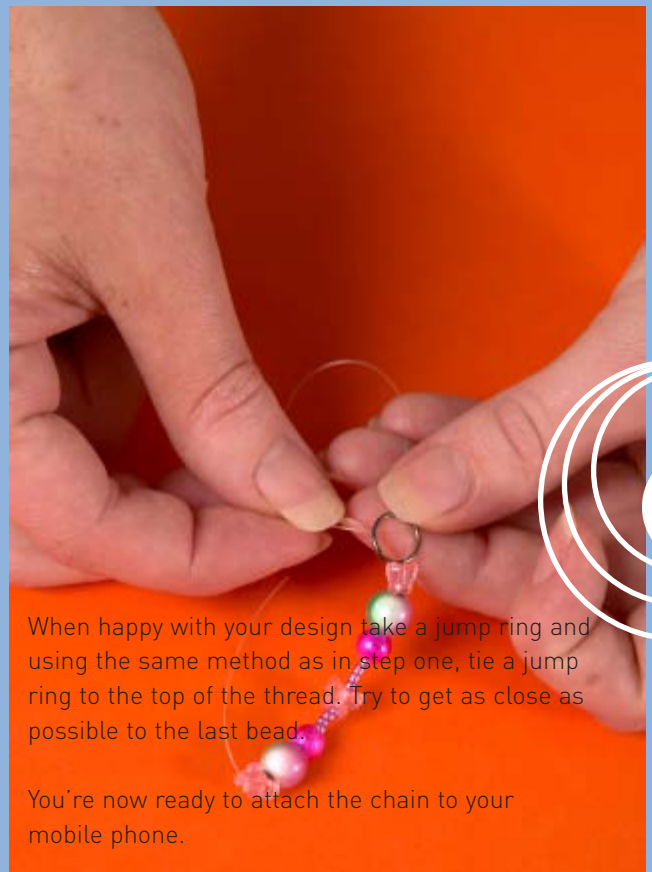

Cut a piece of beading thread 20 – 25cm in length. Create a loop at one end, twist loop in your fingers a few times so that thread curls around itself. Bring the tail of the thread through the loop and pull tightly. You should now have a secure knot at the bottom of your thread. Repeat if needed. Thread other end onto beading needle.

Thread a sequence of beads onto needle in any order you prefer.

We did the following - one plastic butterfly bead, one two-tone pearl bead, one bright pink bead, four pink seed beads, one plastic butterfly bead, four pink seed beads, one bright pink bead, one two-tone pearl bead and one plastic butterfly bead.

When happy with your design take a jump ring and using the same method as in step one, tie a jump ring to the top of the thread. Try to get as close as possible to the last bead.

You're now ready to attach the chain to your mobile phone.
